WypAll® Wiping Solutions Australia — Premium Industrial Wipes & Cleaning Cloths from Toilet Paper Plus

Toilet Paper Plus • June 14, 2026

When it comes to maintaining cleanliness, safety, and efficiency in the workplace, choosing the right wiping solution can make a significant difference. Whether you're cleaning machinery, wiping away grease, managing food preparation areas, or maintaining a professional workplace environment, the WypAll® range from Kimberly-Clark Professional delivers reliable performance for every task.

At Toilet Paper Plus, we stock a comprehensive range of WypAll® wipes and cleaning cloths designed to suit a variety of industries, applications, and budgets. From light-duty paper wipers to heavy-duty reusable industrial cloths, WypAll® products offer a cleaner, stronger, and more hygienic alternative to traditional paper towels and textile rags.

Why Choose WypAll® Wiping Solutions?

WypAll® is a globally recognised Kimberly-Clark Professional brand trusted by businesses across manufacturing, automotive, healthcare, food processing, hospitality, and commercial cleaning sectors.

Designed to simplify workplace cleaning, WypAll® products help businesses achieve consistent results while reducing waste and improving productivity. Unlike standard paper towels that can tear easily or cloth rags that may harbour bacteria, WypAll® wipes are engineered to deliver superior absorbency, strength, and durability.

Whether you're dealing with oil, grease, grime, water spills, solvents, or general cleaning tasks, there is a WypAll® product specifically designed for the job.

Advanced Hydroknit® Technology

Many products within the WypAll® range utilise Kimberly-Clark's innovative Hydroknit® technology. This manufacturing process bonds highly absorbent cellulose fibres with durable polypropylene fibres using high-pressure water jets.

The result is a cloth-like wiping material that offers:

- Exceptional absorbency
- High tear resistance
- Excellent durability
- Low lint performance
- Reusability for multiple cleaning cycles

This advanced construction allows WypAll® wipes to outperform conventional paper towels while remaining cost-effective and hygienic.

Understanding the WypAll® Product Range

WypAll® uses a simple product classification system that makes selecting the right wipe easy. Generally, “L” Series products are designed for lighter-duty applications, while “X” Series products provide greater strength and durability for industrial environments.

WypAll® L Series — Light to Medium Duty Wipers

The WypAll® L Series consists of disposable paper-based wiping products designed for everyday cleaning and maintenance.

WypAll® L10 Wipers

Ideal for:

- General spray-and-wipe cleaning
- Surface wiping
- Light spill clean-up
- Hand drying applications

The L10 range provides an economical solution for workplaces requiring high-volume wiping performance.

WypAll® L20 & L30 Wipers

For businesses needing greater absorbency and strength, the L20 and L30 ranges feature embossed tissue construction designed to tackle:

- Oil and grease removal
- Food preparation spills
- Workshop cleaning
- Maintenance tasks

These wipes deliver excellent value while providing improved performance over standard paper towels.

WypAll® X Series — Heavy Duty Industrial Cloths

The WypAll® X Series is manufactured using Hydroknit® technology to provide cloth-like performance for demanding industrial applications.

WypAll® X50 Wipers

Designed for medium-duty cleaning tasks, X50 wipers feature reinforced construction suitable for:

- Light scrubbing
- Processing lines
- Manufacturing environments
- General maintenance cleaning

WypAll® X60 Wipers

The X60 range combines flexibility with durability, making it ideal for:

- Precision equipment cleaning
- Machinery maintenance
- Tight spaces and hard-to-reach areas
- Multipurpose workplace cleaning

Its soft yet durable construction helps protect delicate surfaces while effectively removing contaminants.

WypAll® X70 Wipers

When heavier cleaning power is required, X70 wipers offer superior absorbency and strength for:

- Heavy oil clean-up
- Liquid spills
- Industrial maintenance
- Workshop environments

These wipes can often be rinsed and reused, helping businesses reduce waste and operating costs.

WypAll® X80 Wipers

The flagship heavy-duty wiping solution, WypAll® X80 is engineered for the toughest industrial environments.

Perfect for:

- Solvent cleaning
- Heavy grease removal
- Metal fabrication workshops
- Mining and manufacturing facilities

X80 wipes maintain their integrity even when exposed to harsh chemicals and rough surfaces, making them a preferred choice for demanding applications.

Specialised WypAll® Solutions

Colour-Coded Wipers

Cross-contamination is a major concern in food service, healthcare, and cleaning environments. WypAll® Colour-Coded Wipers help businesses implement cleaning protocols by assigning specific colours to designated cleaning zones.

Benefits include:

- Improved hygiene standards
- Reduced contamination risks
- HACCP compliance support
- Easier staff training and identification

WypAll® WetTask® Wiping System

The innovative WetTask® system allows businesses to create customised wet wipes using their preferred cleaning chemicals, disinfectants, or solvents.

The sealed dispensing bucket helps:

- Reduce chemical exposure
- Improve workplace safety
- Control chemical usage
- Enhance cleaning efficiency

This versatile system is widely used in healthcare, food processing, manufacturing, and commercial cleaning environments.

Industries That Trust WypAll®

WypAll® wiping solutions are used throughout Australia in industries including:

- Manufacturing and Engineering
- Automotive Workshops
- Food Processing Facilities
- Commercial Kitchens
- Healthcare and Medical Centres
- Hospitality Venues
- Cleaning Contractors
- Warehousing and Logistics
- Mining Operations
- Government and Educational Facilities

Their versatility and reliability make them one of the most trusted wiping brands available today.
